TO OUR CUSTOMERS:—

THE cost of heating water is frequently discussed by our customers. There are many different methods of heating water for domestic purposes and we want our customers to have the best information on their water heating problem so they can have a satisfactory method in use. We want you to know that we maintain a Water Heating Department with Mr. Elmer S. Stack in charge to give our customers information and advice on heating water whether the fuel used is gas or not.

We make a rather broad statement when we say there is no one in New England who knows more about heating water than Mr. Stack but we believe it is true. May we not assist you with information and advice without any obligations on your part? We want to be of service to you.
